Confirmation of Participation in the MILSA Inbound Program

We are pleased to confirm that **Shunyu Wu**, born on 24.3.1999, has **successfully completed the University of Bern's Mentoring Program for Intercultural Learning through Study Abroad (MILSA)**. Throughout the program, she distinguished herself as an active, motivated and diligent participant of this one-year extracurricular voluntary program.

As a MILSA inbound participant, Ms Wu

- attended the *Intercultural Learning in Switzerland Workshop I and II*;
- wrote *online blog contributions* about her intercultural learning experiences throughout her first year at the University of Bern;
- took part in a social program and networked with peers;
- went on cultural outings and learned about the city of Bern and its environment.

By writing and reflecting on experiences and by discussing them with her peers and her mentor, Ms Wu has significantly developed and improved her intercultural learning and communication skills. To name the most important ones, she

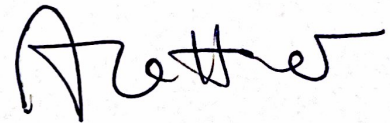

- *reflected on her cultural transition and adaption*;
- *learned about cultural practices in Switzerland and how to deal with intercultural situations*;
- *reflected on her expectations for living and studying in Switzerland*;
- *experienced settling in a new social and cultural environment*.

Moreover, since the mentoring program is taught in the English language, Ms Wu has practised and further improved her written and oral English language skills.

Sincerely,
